### 3. INTRODUCTION

#### Background to the Problem

In Bangladesh, freelancing has become really popular due to its flexibility and remote work opportunities. However, freelancers face several challenges:

- **Tough Competition:** More people are freelancing, making it hard to find jobs.
- **Skills Gap:** Freelancers might not have the right skills that clients need.
- **Finding Jobs:** It's not easy for freelancers to find good projects.
- **Trust Issues:** Freelancers and clients might not trust each other.
- **Payment Problems:** Getting paid on time can be tricky, especially internationally.
- **No Support:** Freelancers lack training and career growth help.
- **Isolation:** Working alone can be lonely, affecting work-life balance.
- **Not Updated:** Freelancers need to know about industry trends.

Solving these issues is important for freelancers to thrive in Bangladesh's freelancing industry.

#### Solution to the Problem

solution to the freelancing problem is the web app "Upwork." This platform connects freelancers and clients worldwide for various projects. Here's how it helps:

1. **Matching Jobs:** Freelancers create profiles with skills, and Upwork matches them with suitable projects from clients.
2. **Global Opportunities:** Freelancers can work for clients from anywhere, expanding job options.
3. **Secure Payments:** Upwork ensures safe payments and builds trust between freelancers and clients.
4. **Skills Proof:** Freelancers showcase past work and skills tests, showing they're qualified.
5. **Remote Work:** Upwork supports remote work, fitting modern work preferences.
6. **Project Management:** Tools help freelancers and clients collaborate smoothly.
7. **Job Variety:** Upwork covers many job types, offering diverse opportunities.
8. **Learning:** Freelancers learn from different projects, even though direct training isn't provided.

Upwork's easy-to-use platform offers a simple solution for freelancers to find work and clients to find skilled freelancers.

## 4. REQUIREMENT SPECIFICATION

### 4.1 System Features

- ☐ There are two types of users in our system, The users are -

- ☐ Freelancer
- ☐ Client

- ☐ Common Feature -

#### 1. Sign In

Functional requirements

- 1.1 The software shall allow users to login with their given username or mobile number and password
- 1.2 The software shall provide the verification code during sign in [only for specific accounts]

Priority Level: High

Precondition: user should have valid Upwork account with verified user Gmail and password

#### 2. Create Account

Functional requirements

- 2.1 The software shall make sure to run proper form validation during registration.
- 2.2 The software shall provide the verification message in Gmail box during Sign Up

Priority Level: High

Precondition: N/A

#### 3. Forgot User Password

Functional Requirements

- 3.1 The software shall allow users to recover password
- 3.3 User password can only be recovered through email
- 3.4 User needs to verify the mail before recovery

Priority Level: High

Precondition: user should have valid Upwork account with verified user Gmail and password

4. Search Job list by selecting category
  - 4.1 Select job type
  - 4.2 Select job location.
  - 4.3 Search and find job related to selected category.

Priority Level: High

Precondition: N/A

5. View job details
  - 5.1 Show Job title, location, deadline, experience, posted date & job type.
  - 5.2 Company overview, job description, job responsibility, job requirements.
  - 5.3 Employee able to apply the job if he/she logged in & show related job according to the category.
  - 5.4 Show error message for multiple apply in the same job

Priority Level: High

Precondition: N/A

6. Freelancer profile page overview
  - 6.1 Show last login time, date with.
  - 6.2 Show user image.
  - 6.3 Show features as a sidebar.

Priority Level: High

Precondition: Login in the website

7. Update Freelancer profile details
  - 7.1 Updateable: First name, Last name, Email, phone no, Education, Gender, street zip code, country.
  - 7.2 User image, Details about user.
  - 7.3 Update to change data.

Priority Level: High Precondition:

Login as Freelancer Precondition:

Login as Employee

8. Adding Freelancer Professional Qualification
  - 8.1 Add multiple qualification.
  - 8.2 Provide Country, Institute name, Time frame, Name of degree, Certificate.

Priority Level: High

Precondition: Login as Freelancer

9. Adding Freelancer Language Proficiency

9.1 Add multiple language.

9.2 Provide Language name.

9.3 Select Speaking level (Fair, Good, Very good).

9.4 Select Reading level (Fair, Good, Very good).

9.5 Select Writing level (Fair, Good, Very good)

Priority Level: High

10. Adding Freelancer academic qualifications

10.1 Add multiple qualifications.

10.2 Provide Education level, Institute name, Course name, time frame.

10.3 Select Country, attach certificate and transcript

Priority Level: High

Precondition: Login as Freelancer

11. Adding Freelancer working experience

11.1 Add multiple experience.

11.2 Provide Institution name, supervisor name, supervisor telephone, job title, starting & ending date, duties and responsibilities

Priority Level: High Precondition:

Login as Freelancer

12. Adding Freelancer other attachment

12.1 Add multiple attachment.

12.2 Provide attachment type, Issuer, attachment image

Priority Level: Medium

Precondition: Login as Freelancer

13. Show Freelancer applied jobs

13.1 View applied jobs.

13.2 View job title, location, company name, applied date, job type

Priority Level: High

Precondition: Login as Freelancer

14. User Logout

14.1 Logout to redirect homepage.

Priority Level: High

Precondition: Login as Freelancer

### 15. Update Client profile details

- 15.1 Updateable: Company name, established in, type, website, select people, city/town, country, zip code, street, phone no. company background, services, expertise.
- 15.2 Update company logo.
- 15.3 Update to change data.

Priority Level: High Precondition:

Login as Client

### 16. Company overview

- 16.1 Show company name, logo, established year, type, website, background, services, expertise.
- 16.2 Offered job from that company with job name, category, logo, type, location, required years of experience, deadline & details button

Priority Level: High

Precondition: Login as Client

### 17. Post a job (Only Client can post)

- 17.1 Provide job title, city, closing date, job description, job responsibilities, requirements.
- 17.2 Select country, job category, job type, experience.

Priority Level: High

Precondition: Login as Client

### 18. View Posted job

- 18.1 Posted job showing sequentially with company logo, title, category, type, location, city, deadline.
- 18.2 Employer able to modify and delete the post.
- 18.3 Also, able to view the applicant's proposal, for that job, who applied to that job.

Priority Level: High

Precondition: Login as Client

### 19. Contact us

- 19.1 Show address, email, phone and some social link (Facebook, twitter, Instagram)
- 19.2 Provide your name. email and message.
- 19.3 Get in touch to reach administration.

Priority Level: High

Precondition: N/A

## 20. Client profile overview

20.1 Display image, name, degree & email.

20.2 About employee

20.3 Education, working experience, training and workshop, professional qualifications, other attachments, language proficiency & referees.

Priority      Level:      High

Precondition: Login as Client

## 4.2 System Quality Attributes

- o **Performance:** Performance criteria specify how quickly or how successfully a system must carry out particular functionalities. throughput, capacity, and timeliness. It also discusses how a situation with too much traffic can affect the system's operation (when more users are trying to use it at a time).
- o **Efficiency:** This characteristic specified how to use the system effectively. It deals with the hardware requirements for carrying out the various system operations. It consists of its processing power, storage capacity, and data transmission ability (Local server to Central Server).
- o **Usability:** The ease of usage can be used to gauge this. The software should be simple to use. Usability refers to how simple it is for the system's initial user, a student, to utilize and obtain services. This is required while users will use it at danger time.
- o **Integrity:** Integrity, this element has to do with the integrity of the other system, for example, how easily it can cope up in mobile phone as well as computer.
- o **Reliability:** How the system is reliable while using it. Whether it remains all day in maintenance or is it can provide its service without crashing most of the time.
- o **Testability:** If the system encounters a bug or error, it must be able to test for that bug or error.
- o **Security:** It prevents unauthorized access of random people so that the system data cannot be at risk. Only registered users can use the data.

## 4.3 System Interfac

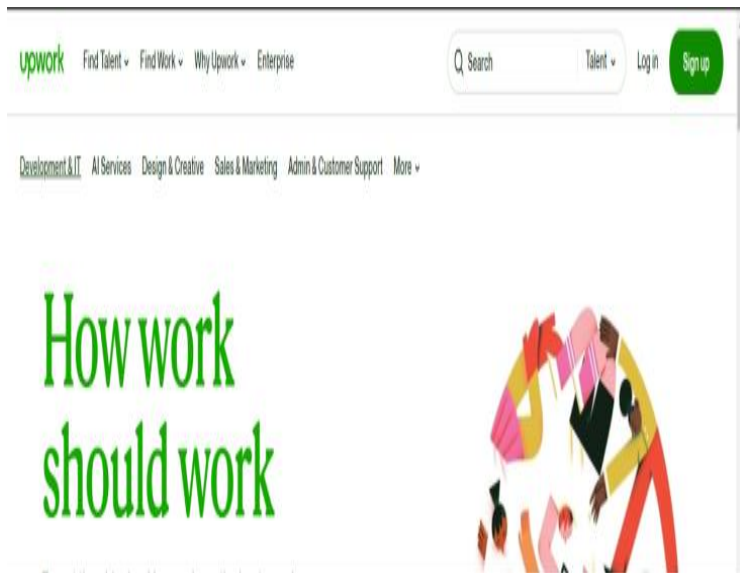

Fig.1: Homepage of Upwork

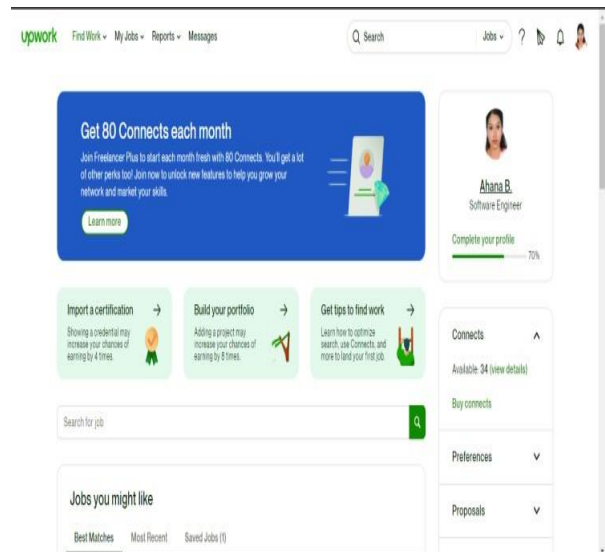

Fig.2: Find work page on Upwork

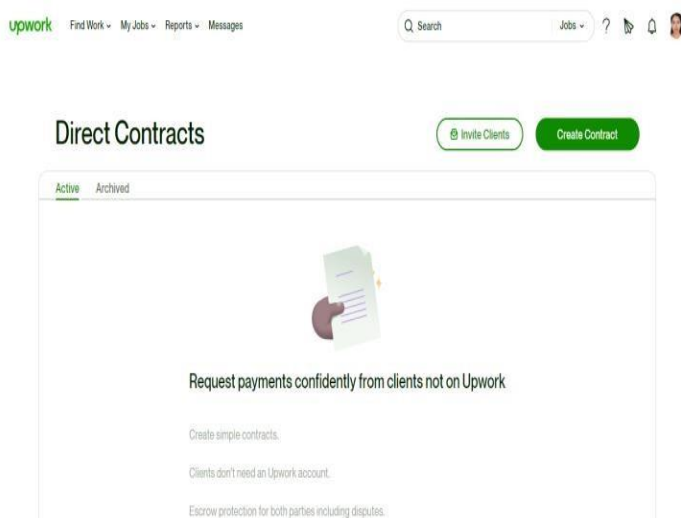

Fig.3: search job page on Upwork

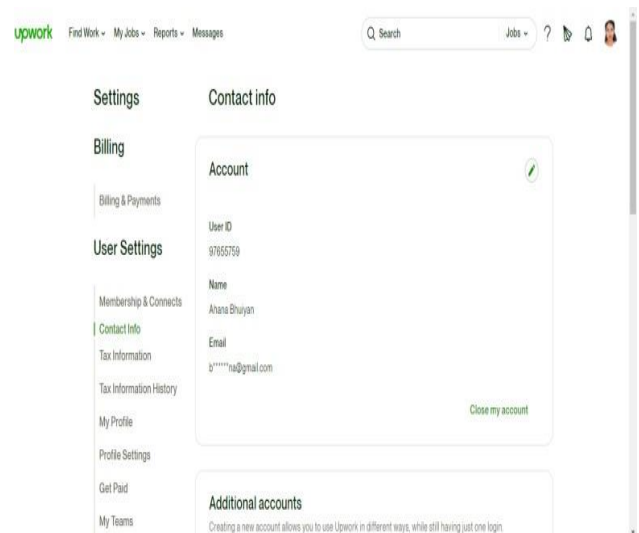

Fig.4: Contact info page on Upwork

## 5. FEATURES NOT TO BE TESTED

The following is a list of the areas that will not be specifically addressed.

- Repeated CRUD operation for the reference, professional qualities, CV & more functionalities.
- Maintenance of the system
- Network facilities

## 6. TESTING APPROACH

### 6.1 Testing Levels

The testing process for Upwork will primarily involve SYSTEM testing. Due to the unavailability of the source code, UNIT and INTEGRATION testing are not feasible. Moreover, due to time limitations, it's not possible to gather users for ACCEPTANCE testing. Hence, a specialized team of testers will exclusively conduct SYSTEM testing.

The dedicated testing team will meticulously carry out SYSTEM testing to identify any defects in the external system interface prior to the product's release. Automated testing tools will play a role in executing these tests. The team will initiate a collaborative session to outline the comprehensive testing strategy, allocate test cases, execute the tests, and subsequently document the outcomes.

### 6.2 Test Tools

Selenium IDE: This browser extension primarily facilitates the recording and execution of test cases. It finds common use among test case developers. Its user-friendly interface streamlines the process of running test cases, supports the reuse of these cases, and aids in conducting control flow tests. This tool is predominantly utilized for automation testing purposes.

### 6.3 Meetings

The meetings were conducted for 3 days. The summary of the each of the meetings are given below:

- ☐ Meeting 1 (20<sup>th</sup> August 2023): Requirements were gathered from the website. Some of the features were tried out and noted down.
- ☐ Meeting 2 (23rd Wednesday 2023): Test case for the features were devised and distributed among the testers of the team. Test cases were run by each of the members of the testing team individually and the results were reported.
- ☐ Meeting 3 (26th August 2023): Final test cases were run the results were reported. Final meeting was taken to discuss the findings of the test cases which were summarized and test case report was drafted.

## 7. TEST CASES/TEST ITEMS

### 1. Sign-up as a Freelancer –

Project Name: Upwork		Test Designed by: Ahana Bhuiyan		
Test Case ID: UPW_TC-01		Test Designed date: 24/08/2023		
Test Priority (Low, Medium, High): high		Test Executed by: Ahana Bhuiyan		
Module Name: Freelancer Signup		Test Execution date: 24/08/2023		
Test Title: Freelancer Registration Process				
Description: This test case verifies the functionality of the freelancer signup process on the Upwork platform. It ensures that new users can successfully create their freelancer accounts by providing accurate information and following the necessary steps.				
Precondition (If any): <ul style="list-style-type: none"><li>Internet connectivity is available.</li><li>The Upwork website is accessible.</li></ul>				
Test Steps	Test Data	Expected Results	Actual Results	Status (Pass/Fail)
1. Browse to the Upwork website. 2. Click on the "Sign Up" button. 3. Select the "Apply as a freelancer" option. 4. Select region, then agree with terms & condition. 5. Click the create my account. 6. Then click verify with your email.	First Name: Ahana Last Name: Bhuiyan Email Address: bhuiyanahana@gmail.com Password: trapa#234 Region: Bangladesh	The system should display a confirmation message and redirect the user Gmail to verify & show user profile upon successful submission.	As expected,	pass
Post Condition: User's freelancer profile should be created, and they should be able to access their Upwork dashboard.				

## 2. Login as a Freelancer –

Project Name: Upwork			Test Designed by: Ahana Bhuiyan	
Test Case ID: UPW_TC-02			Test Designed date: 24/08/2023	
Test Priority (Low, Medium, High): high			Test Executed by: Ahana Bhuiyan	
Module Name: Freelancer Login Process			Test Execution date: 24/08/2023	
Test Title: Verify Freelancer Login Process				
Description: This test case aims to verify the successful login process for freelancers on the Upwork platform. It ensures that registered freelancers can access their accounts by providing correct login credentials.				
Precondition (If any): <ul style="list-style-type: none"><li>The user must have a registered Upwork freelancer account.</li></ul>				
Test Steps	Test Data	Expected Results	Actual Results	Status (Pass/Fail)
1. Go to Upwork website. 2. Click "Log In" option 3. Enter Email Address. 4. Enter Password. 5. Click "Log In" button.	Email Address: bhuiyanahana@gmail.com Password: trapa#234	The system should authenticate the user's credentials and redirect them to their freelancer dashboard upon successful login.	As expected,	pass
Post Condition: N/A				

### 3. Login test with invalid data –

Project Name: Upwork			Test Designed by: Ahana Bhuiyan	
Test Case ID: UPW_TC-03			Test Designed date: 24/08/2023	
Test Priority (Low, Medium, High): high			Test Executed by: Ahana Bhuiyan	
Module Name: Freelancer Login Process			Test Execution date: 24/08/2023	
Test Title: Verify Freelancer Login Process with Invalid Data				
Description: This test case aims to verify the behavior of the Upwork freelancer login process when invalid login credentials are provided. It ensures that appropriate error messages are displayed and users are prevented from logging in with incorrect data				
Precondition (If any): <ul style="list-style-type: none"><li>The user must logout from their account.</li></ul>				
Test Steps	Test Data	Expected Results	Actual Results	Status (Pass/Fail)
1. Go to Upwork website. 2. Click "Log In" option 3. Enter Email Address. 4. Enter Incorrect Password. 5. Click "Log In" button.	Email Address: bhuiyanahana@gmail.com (registered freelancer's email)  Password: 123456789 [incorrect password]	The system should display an error message indicating that the login credentials are incorrect. The user should not be able to log in.	As expected,	Pass
Post Condition: N/A				

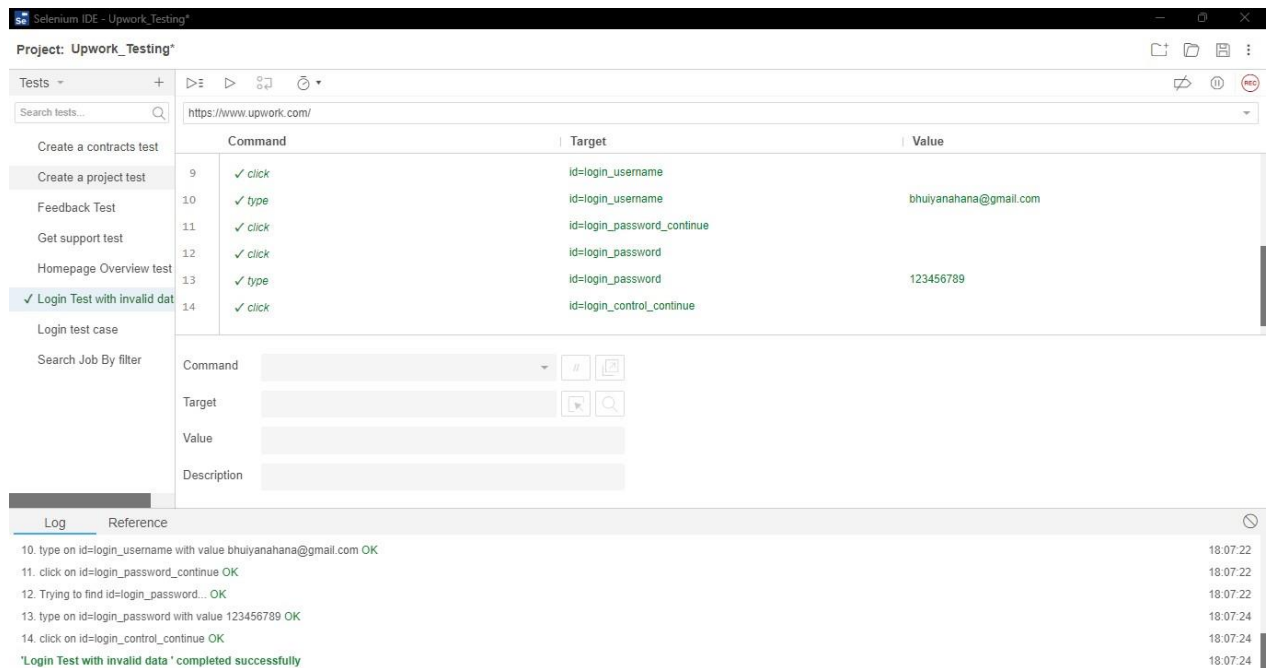

Fig.7: Invalid Login test as freelancer

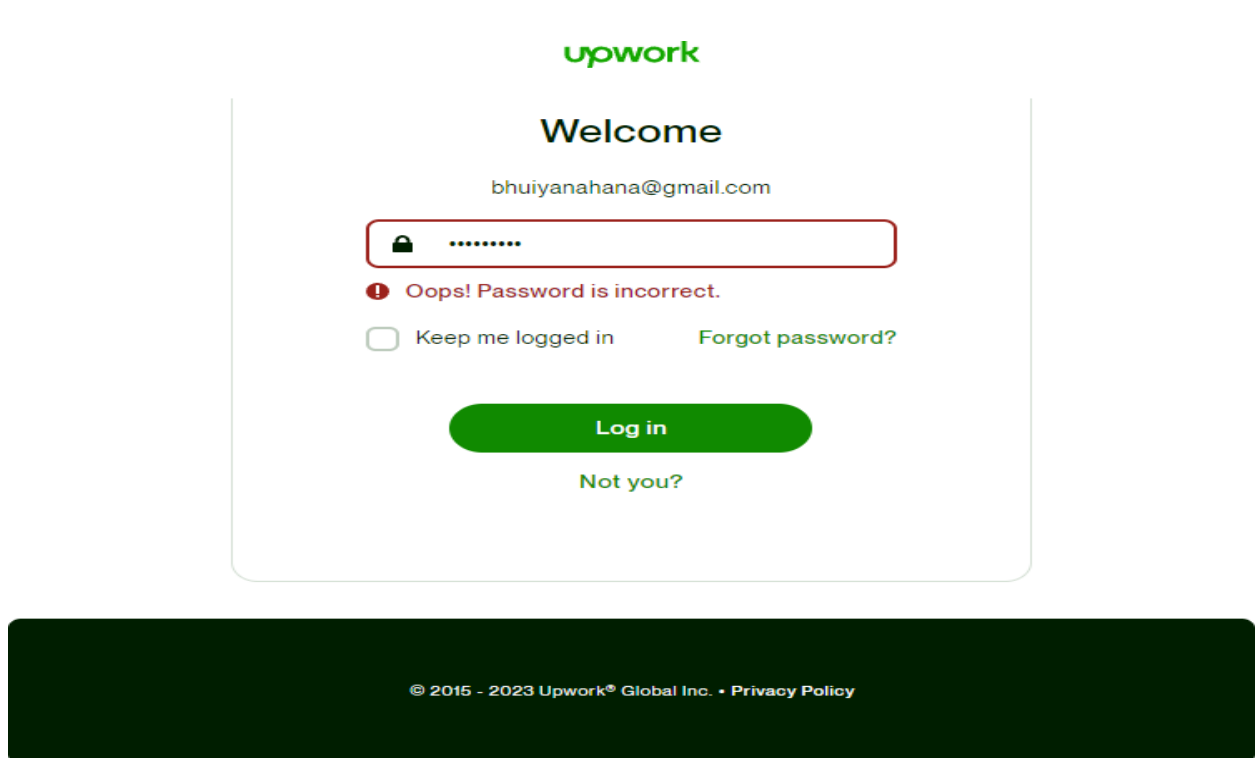

Fig.8: Invalid Login as freelancer

#### 4. Search Job Using filter –

Project Name: Upwork			Test Designed by: Ahana Bhuiyan	
Test Case ID: UPW_TC-04			Test Designed date: 24/08/2023	
Test Priority (Low, Medium, High): high			Test Executed by: Ahana Bhuiyan	
Module Name: Job Search Functionality			Test Execution date: 24/08/2023	
Test Title: Verify Job Search by Filter Functionality				
Description: This test case aims to verify the accuracy and functionality of the job search feature on the platform by applying various filters. It ensures that the search results match the selected filters and that the system behaves as expected during the filtering process.				
Precondition (If any): <ul style="list-style-type: none"><li>The user must be logged into their account on the job search platform.</li></ul>				
Test Steps	Test Data	Expected Results	Actual Results	Status (Pass/Fail )
1. Log in to the job search platform 2. Locate & access the“Search” section. 3. Type any kind of Jobname. 4. Apply Filter: Experience level – Entrylevel. 5. Apply Filter: Job TypeFull-Time. 6. Click "Search" button. 7. Analyze the searchresults.	Job Search: Web Developer	The system should display job listings thatmeet the specified filter criteria. Each displayed job should match the applied filters: full-timejob, entry-level experience.	As expected,	pass
Post Condition: N/A				

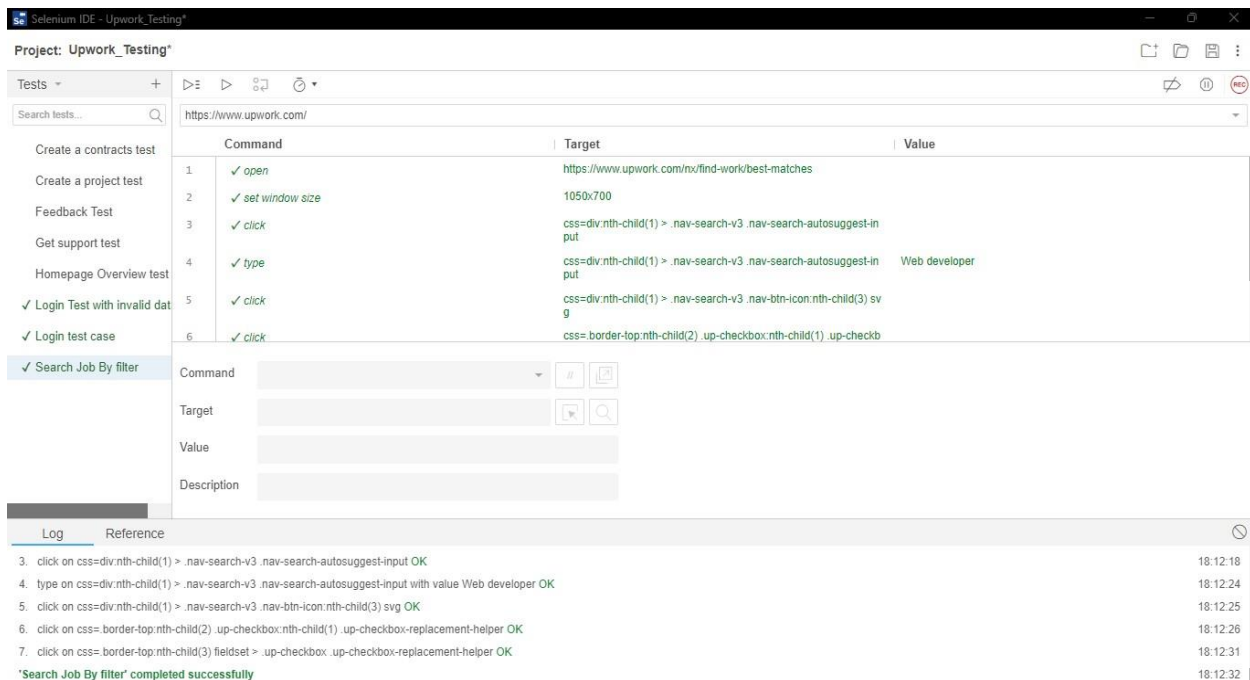

Fig.9: Search job using filter test as freelancer

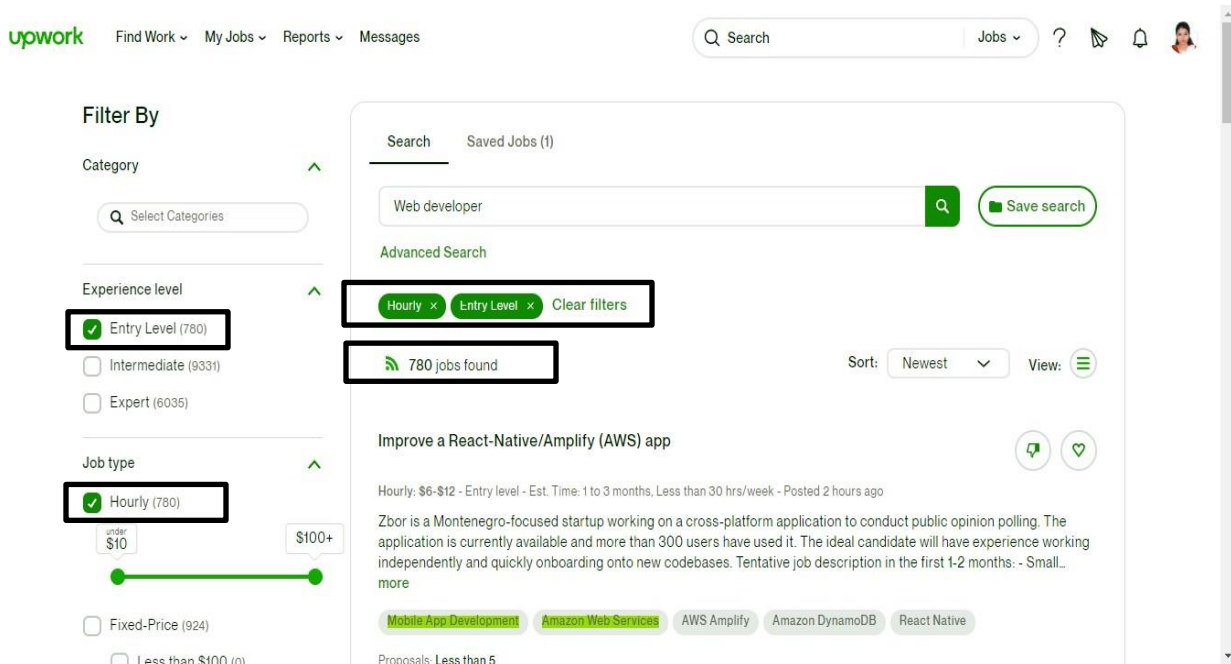

Fig.10: Search job using filter as freelancer

## 5. Create a Contract –

Project Name: Upwork		Test Designed by: Ahana Bhuiyan		
Test Case ID: UPW_TC-06		Test Designed date: 24/08/2023		
Test Priority (Low, Medium, High): Medium		Test Executed by: Ahana Bhuiyan		
Module Name: Project Creation Process		Test Execution date: 24/08/2023		
Test Title: Verify Project Creation Process on Upwork				
Description: This test case aims to verify the process of creating a project on the Upwork platform. It ensures that users can successfully initiate a project creation, provide relevant details, and receive appropriate feedback upon submission.				
Precondition (If any): <ul style="list-style-type: none"><li>The user must be logged into their Upwork account.</li></ul>				
Test Steps	Test Data	Expected Results	Actual Results	Status (Pass/Fail)
1. Log in to the Upworkplatform. 2. Access direct contracts. 3. Select Create a NewContract 4. Enter Client email 5. Enter Contract name 6. Enter Description 7. Select the contract type: "Hourly" or "FixedPrice." 8. Select weekly limit &End date. 9. Review the entereddetails. 10. Click "Submit" to create the contract.	Client email: nondonroy09@gmail.com Contract name –SohozPAY Description - This contract delineates the arrangement for delivering quality assurance and testing services for the SohozPAY platform. Contract type: "Hourly" Weekly limit – 6 hours End Date - Undefined	The system should guide the user through each step of the contract creationprocess. The contract details should be accurately saved and displayed.	The "Create Contract" button was unresponsive when clicked, preventing the initiation of the contract creationprocess. No further steps could be performed due to this issue.	Fail
Post Condition: The newly created contract should be promptly visible in the user's "Contracts" dashboardsection.				

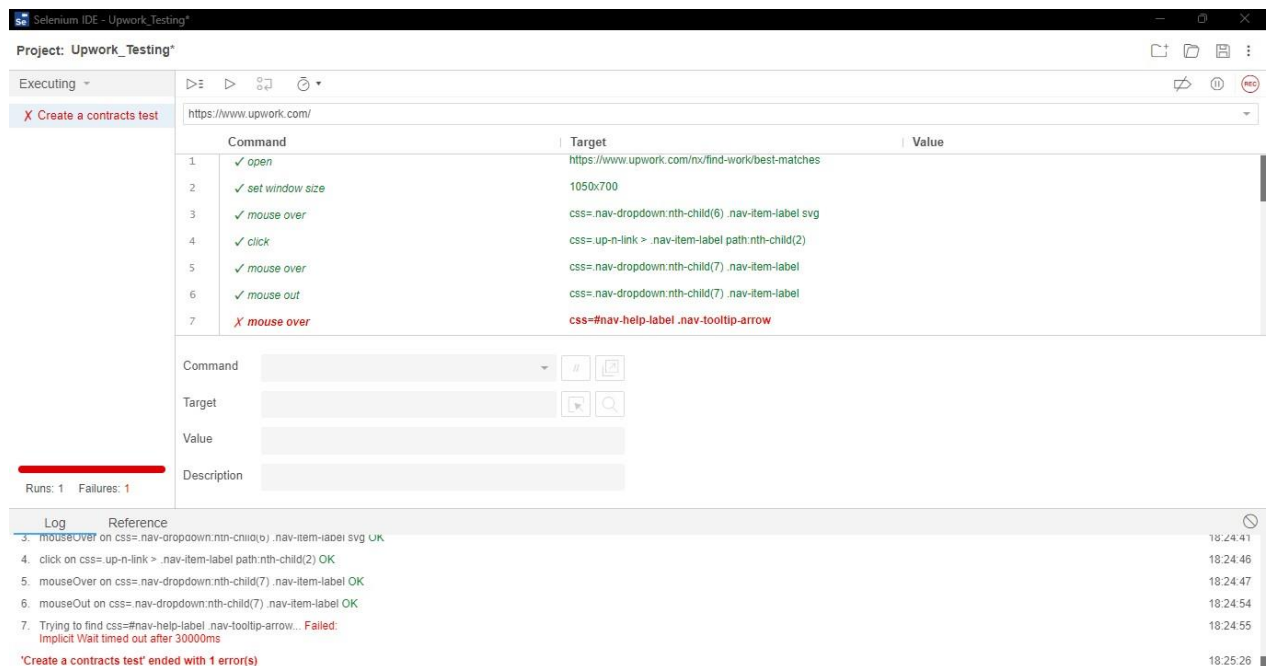

Fig.11: Create a contact test as Company

## 6. Create a Project –

Project Name: Upwork			Test Designed by: Ahana Bhuiyan	
Test Case ID: UPW_TC-06			Test Designed date: 24/08/2023	
Test Priority (Low, Medium, High): High			Test Executed by: Ahana Bhuiyan	
Module Name: Project Creation Process			Test Execution date: 24/08/2023	
Test Title: Verify Project Creation Process on Upwork				
Description: This test case aims to verify the process of creating a Project on the Upwork platform. It ensures that users can successfully initiate a project creation, provide relevant details, and receive appropriate feedback upon submission.				
Precondition (If any): <ul style="list-style-type: none"><li>The user must be logged into their Upwork account.</li></ul>				
Test Steps	Test Data	Expected Results	Actual Results	Status (Pass/Fail)

<ol style="list-style-type: none"> <li>1. Log in to the Upworkplatform.</li> <li>2. Navigate the "Projects"section.</li> <li>3. Select the "Create aNew Project" button.</li> <li>4. Enter Project Title.</li> <li>5. Choose Project Category.</li> <li>6. Add delivery days.</li> <li>7. Add Project price.</li> <li>8. Upload a project cover.</li> <li>9. Provide a brief ProjectDescription.</li> <li>9. Add Requirements</li> <li>10. Review the entereddetails.</li> <li>11. Click "Save" to createthe project.</li> </ol>	<p>Project Title: office Employee Management system</p> <p>Category: HR &amp; consulting</p> <p>Budget: \$50</p> <p>Duration: 10 days</p> <p>Description: This project involves designing and developing a responsive employee management application.</p>	<p>The system should guide theuser through each step of the project creation process. The project details should be accurately savedand displayed.</p>	<p>The "Delivery days" button was unresponsive when clicked, preventing the initiation of the contract creation process. No further steps could be performed due to this issue.</p>	<p>Fa il</p>
<p>Post Condition: The newly created Project should be promptly visible in the user's "Project" dashboardsection.</p>				

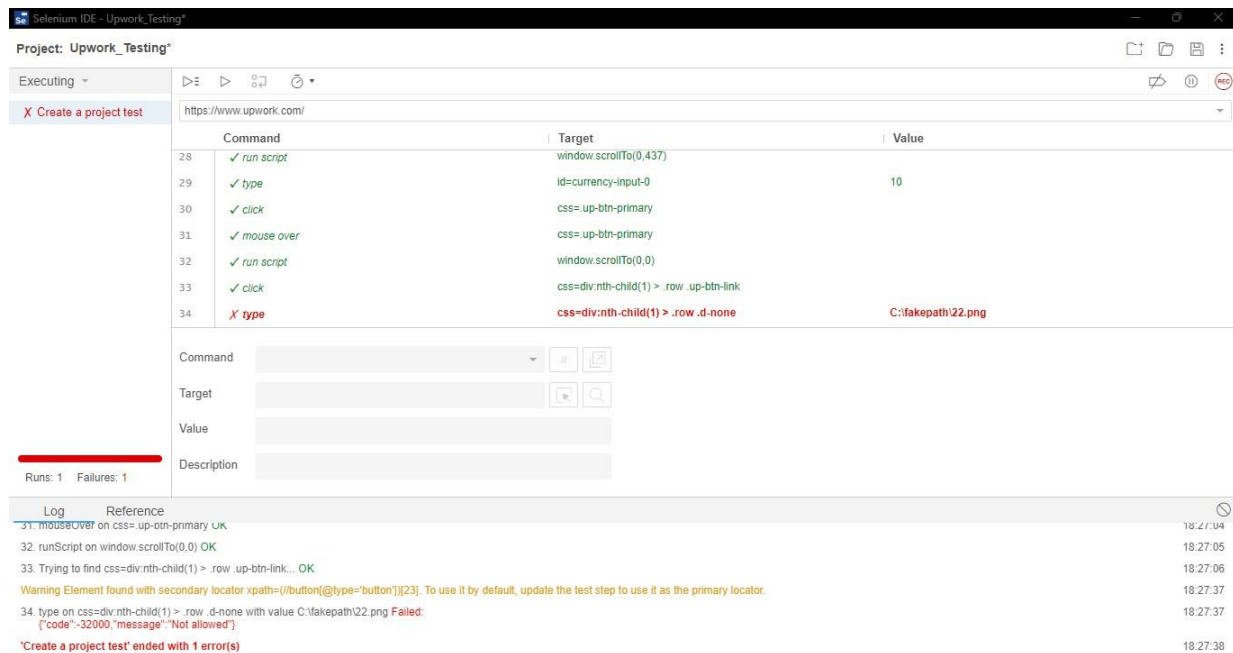

Fig.12: Create a project test

## 7. Homepage overview –

Project Name: Upwork		Test Designed by: Ahana Bhuiyan		
Test Case ID: UPW_TC-07		Test Designed date: 24/08/2023		
Test Priority (Low, Medium, High): High		Test Executed by: Ahana Bhuiyan		
Module Name: Freelancer Homepage		Test Execution date:24/08/2023		
Test Title: Verify Freelancer Homepage Overview on Upwork				
Description: This test case aims to verify the overview of the freelancer homepage on the Upwork platform. It ensures that the freelancer's homepage displays relevant information and links to assist freelancers in navigating the platform efficiently.				
Precondition (If any): <ul style="list-style-type: none"><li>The user must be logged into their Upwork account.</li></ul>				
Test Steps	Test Date	Expected Results	Actual Results	Status (Pass/Fail)
1. Log in to the Upwork platform as a freelancer 2. Navigate to the freelancer homepage. 3. Verify user picture display top of the page. 4. Confirm that the "Find Work" and "My Jobs" tabs are present and clickable. 5. Ensure that the "Find Work" tab redirects to the job search page. 6. Verify that the "Proposals" section displays the number of submitted proposals by the freelancer. 7. Check if the "Connects" section indicates the number of available connects for submitting proposals. 8. Confirm the presence of the "Recommended Jobs" section displaying relevant job suggestions. 9. Review the entered details. 10. Verify that the footer of the homepage contains useful links such as "Help & Support," "Terms of Service," and "Privacy Policy."		The freelancer homepage should provide a clear overview of the freelancer's profile information, navigation options, job-related details, and relevant sections for efficient interaction with the platform.	The "Find work" button was unresponsive when clicked, no further steps could be performed due to this issue.	Fail
Post Condition: The freelancer should be able to navigate to different sections of the platform using the provided links and access relevant job opportunities and information.

## 11. Update user profile details

Project Name: Upwork		Test Designed by: Md Aminul Islam		
Test Case ID: UPW_TC-11		Test Designed date: 24/08/2023		
Test Priority (Low, Medium, High): high		Test Executed by: Md Aminul Islam		
Module Name: Update User profile		Test Execution date: 24/08/2023		
Test Title: Update user profile				
Description: Test the website Update Employee profile page				
Precondition (If any): Login as Employee.				
Test Steps	Test Data	Expected Results	Actual Results	Status (Pass/Fail)
1. Go to the homepage 2. Click on profile 3. Enter Details 4. Click Update	Institute: AIUB	Show a message your profile has been updated successfully	As expected,	Pass
Post Condition: User is validated with database and successfully changed user information.				

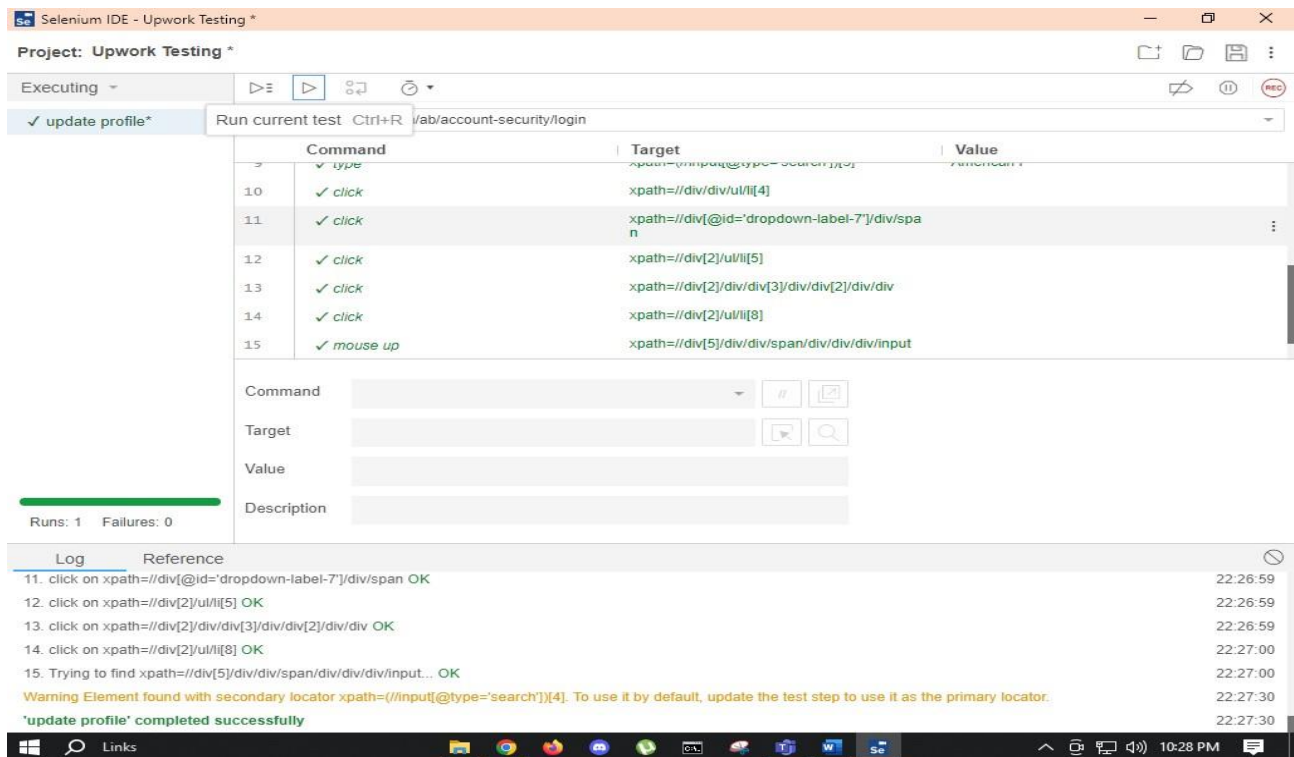

Fig.19: Update user profile details test

## 12. Update user password

Project Name: Upwork		Test Designed by: Md Aminul Islam		
Test Case ID: UPW_TC-12		Test Designed date: 24/08/2023		
Test Priority (Low, Medium, High): high		Test Executed by: Md Aminul Islam		
Module Name: Update User password		Test Execution date: 24/08/2023		
Test Title: Update User password				
Description: Test the website Update user password page				
Precondition (If any): Login as User				
Test Steps	Test Data	Expected Results	Actual Results	Status (Pass/Fail)

<ol style="list-style-type: none"> <li>1. Go to the homepage</li> <li>2. Click on profile</li> <li>3. Click on changepassword</li> <li>4. Enter new password</li> <li>5. Enter confirmpassword</li> <li>6. Click Update</li> </ol>		Show a message password updated successfully	As expected,	Fail
Post Condition: user is validated with database and successfully changed user password.				

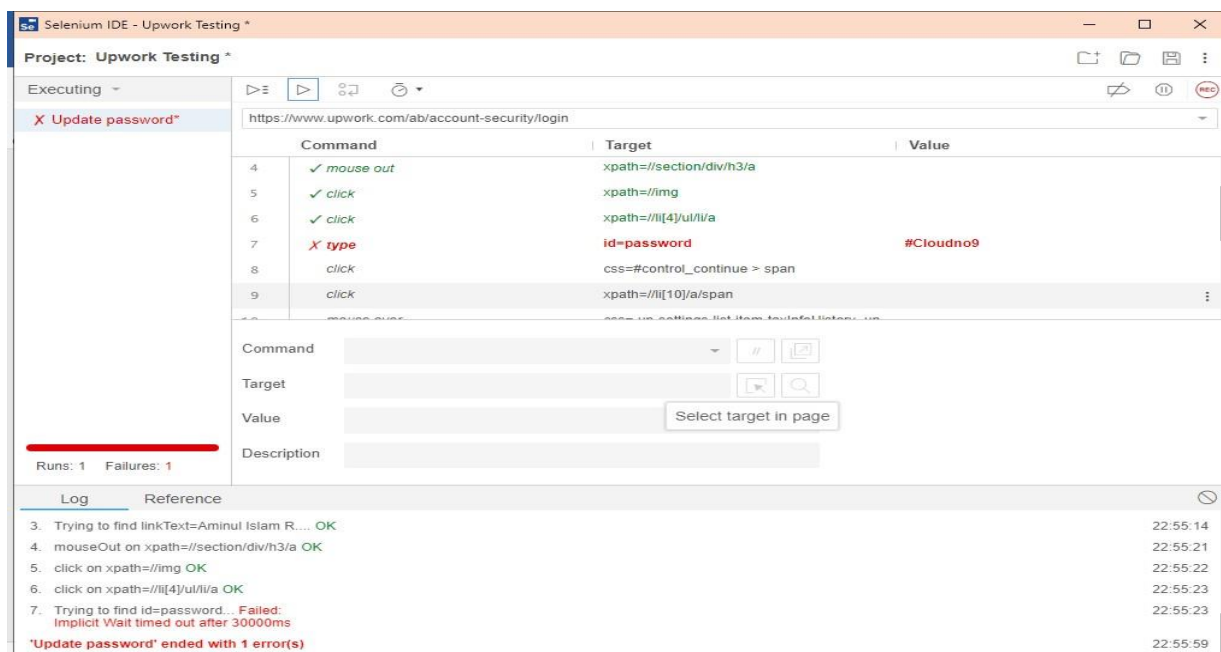

Fig.20: user password test

### 13. Add Professional Qualifications

Project Name: Upwork	Test Designed by: Md Aminul Islam
Test Case ID: UPW_TC-13	Test Designed date: 24/08/2023
Test Priority (Low, Medium, High): high	Test Executed by: Md Aminul Islam
Module Name: Add Professional Qualifications	Test Execution date: 24/08/2023
Test Title: Add Professional Qualifications	
Description: Test the website Add ProfessionalQualifications page.	
Precondition (If any): Login as user	

Test Steps	Test Data	Expected Results	Actual Results	Status (Pass/Fail)
<ol style="list-style-type: none"> <li>Go to the homepage</li> <li>Click on Login</li> <li>Click on profile</li> <li>Click on professional qualifications</li> <li>Click Add New</li> <li>Enter Details</li> <li>Click Submit</li> </ol>	Country: Bangladesh  Institution Name: EBL  Course Title: SQA  Time Frame: 2023-Present	Show a message Professional qualification was added successfully	As expected,	Pass
Post Condition: user is validated with database and successfully add professional qualifications.				

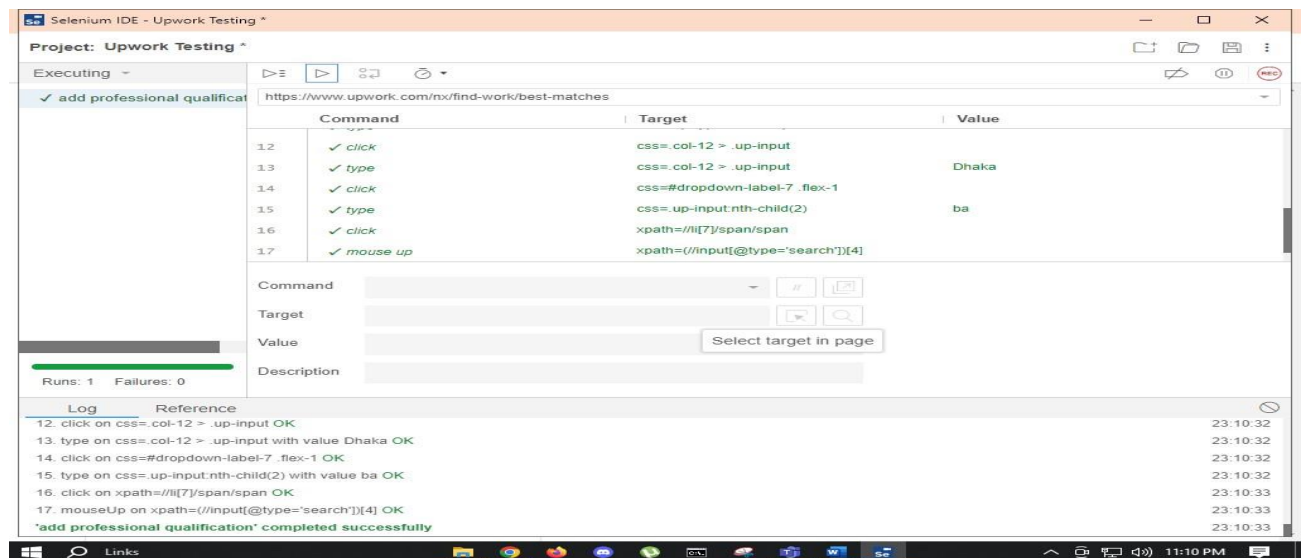

Fig.21: Add professional qualification test

#### 14. Add Language Proficiency

Project Name: Upwork	Test Designed by: Md Aminul Islam
Test Case ID: UPW_TC-14	Test Designed date: 24/08/2023
Test Priority (Low, Medium, High): high	Test Executed by: Md Aminul Islam
Module Name: Add Language Proficiency	Test Execution date: 24/08/2023
Test Title: Add Language Proficiency	
Description: Test the website Add Language Proficiency page.	

Precondition (If any): Login as user				
Test Steps	Test Data	Expected Results	Actual Results	Status (Pass/Fail)
<ol style="list-style-type: none"> <li>1. Go to the homepage</li> <li>2. Click on Login</li> <li>3. Click on profile</li> <li>4. Click on Language Proficiency</li> <li>5. Click Add new</li> <li>6. Enter Details</li> <li>7. Click Submit</li> </ol>	Language: French  Speak: Basic	Show a message Language have been added	As expected,	Pass
Post Condition: Employee is validated with database and successfully add language proficiency.				

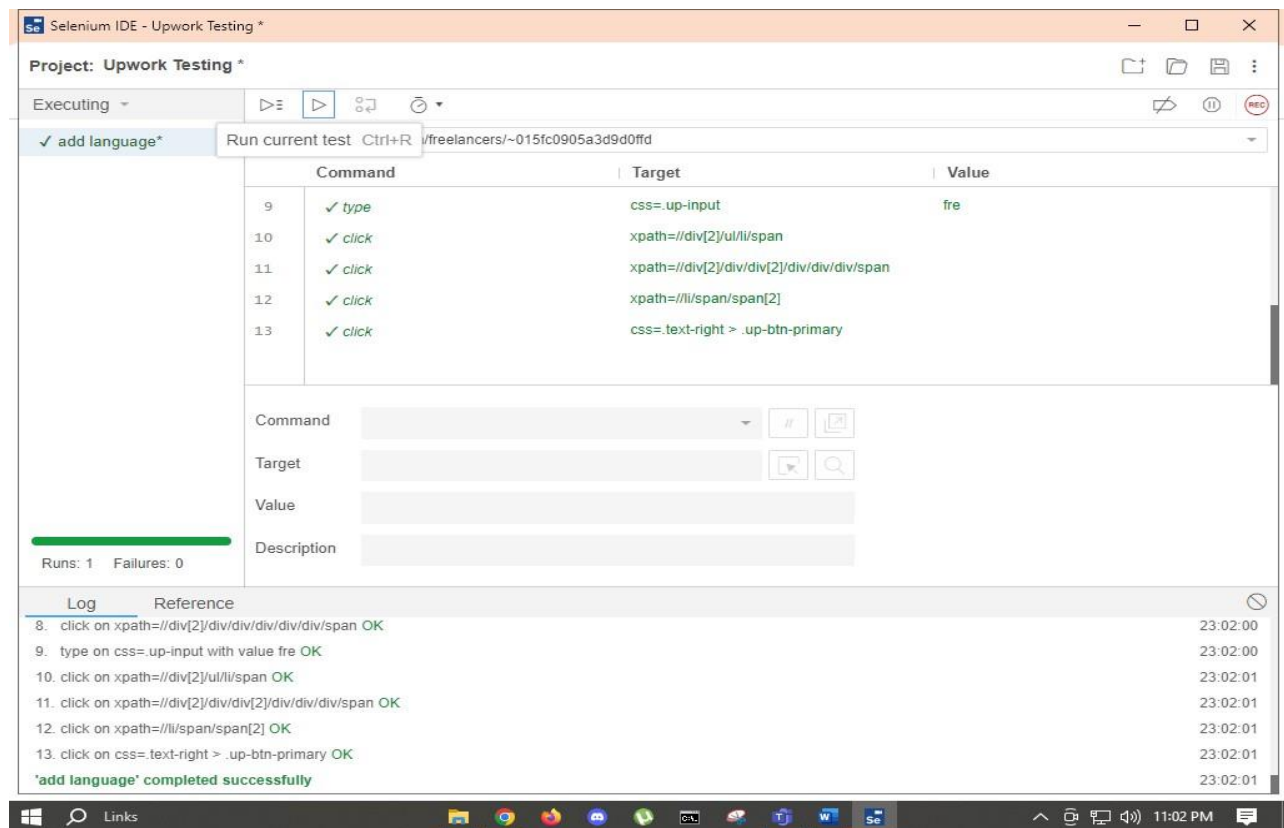

Fig.22: Add language test

## 15. Add Training & Workshop

Project Name: Upwork		Test Designed by: Md Aminul Islam		
Test Case ID: UPW_TC-15		Test Designed date: 24/08/2023		
Test Priority (Low, Medium, High): high		Test Executed by: Md Aminul Islam		
Module Name: Add Training & Workshop		Test Execution date: 24/08/2023		
Test Title: Add Training & Workshop				
Description: Test the website Add Training & Workshop page.				
Precondition (If any): Login as User				
Test Steps	Test Data	Expected Results	Actual Results	Status (Pass/Fail)
1. Go to the homepage 2. Click on Login 3. Enter email & password to login 4. Click on profile 5. Click on Training & Workshop 6. Click Add new 7. Enter Details 8. Click Submit	Training Name: AWS Cloud  Time Frame: 2023-*Present	Show a message Training or workshop have been added successfully	As expected,	Pass
Post Condition: user is validated with database and successfully add training & workshop.				

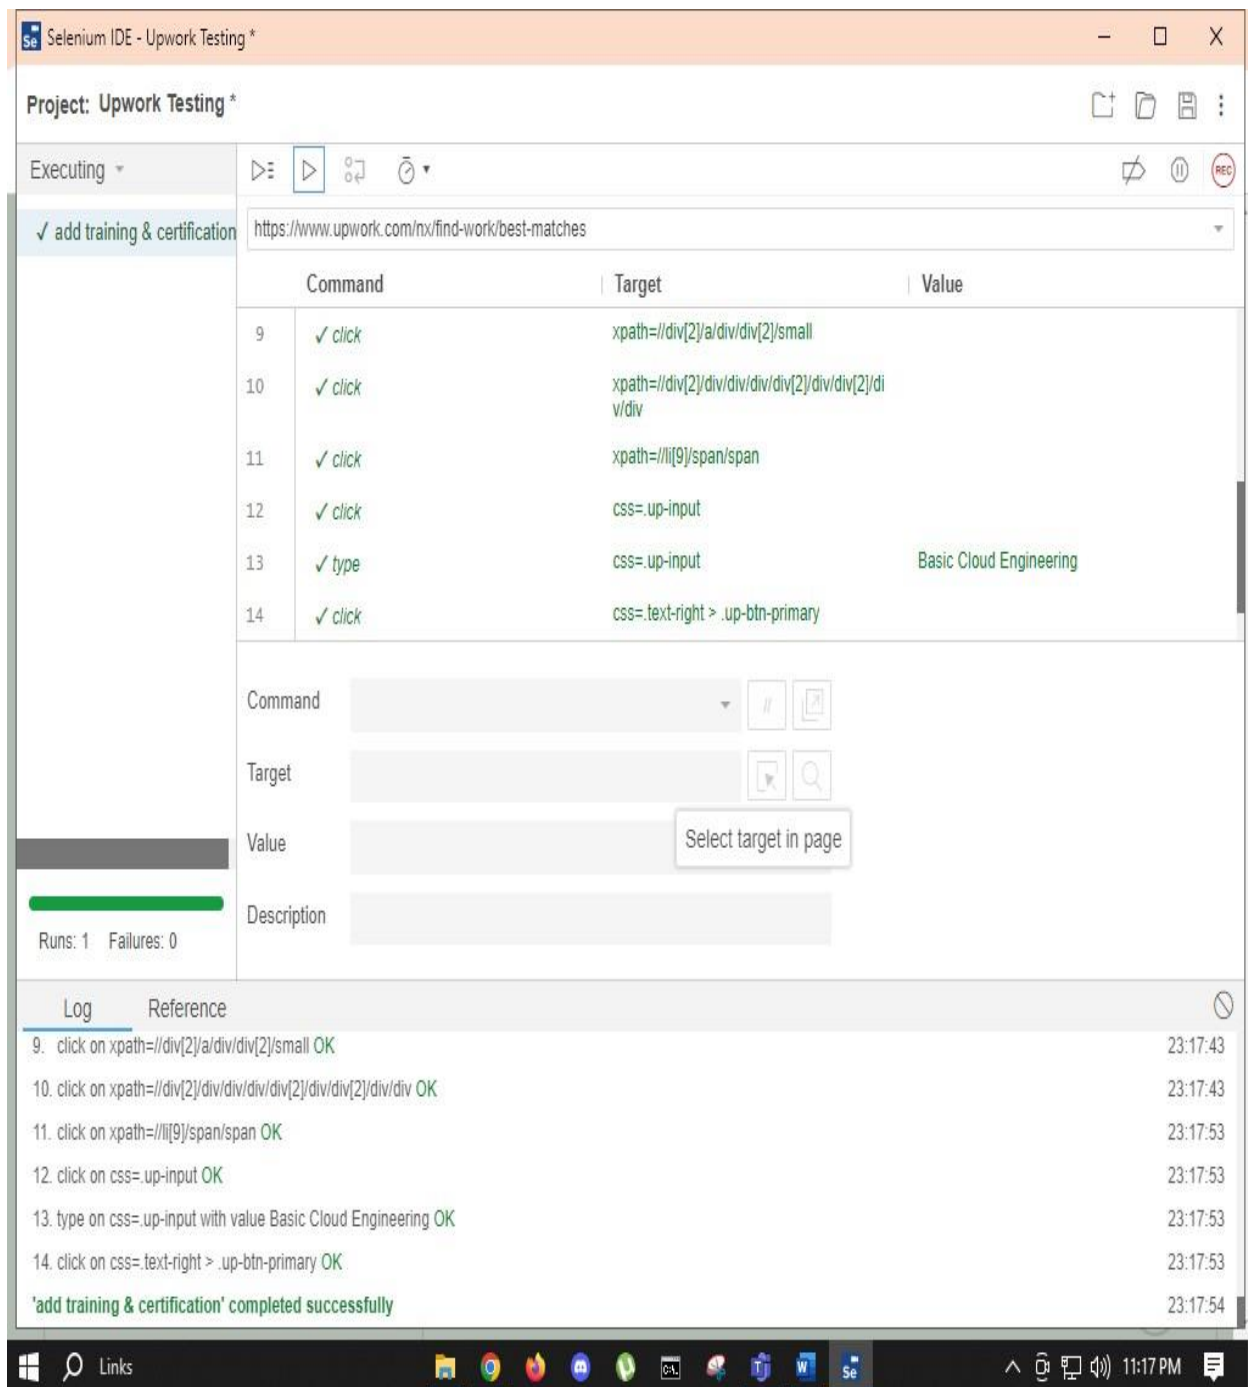

Fig.23: Add Training and workshop test

## 16. Add category

Project Name: Upwork		Test Designed by: Md Aminul Islam		
Test Case ID: UPW_TC-16		Test Designed date: 24/08/2023		
Test Priority (Low, Medium, High): Medium		Test Executed by: Md Aminul Islam		
Module Name: Add category		Test Execution date: 24/08/2023		
Test Title: Add category				
Description: Test the website feature add category.				
Precondition (If any): Login as User				
Test Steps	Test Data	Expected Results	Actual Results	Status (Pass/Fail)
1. Go to the homepage 2. Click on Login 3. Choose add category 4. Select a category 5. Click Submit	Add Category: QA testing	Show a message Training or workshop have been added successfully	As expected,	Pass
Post Condition: user is validated with database and search appropriate job title.				

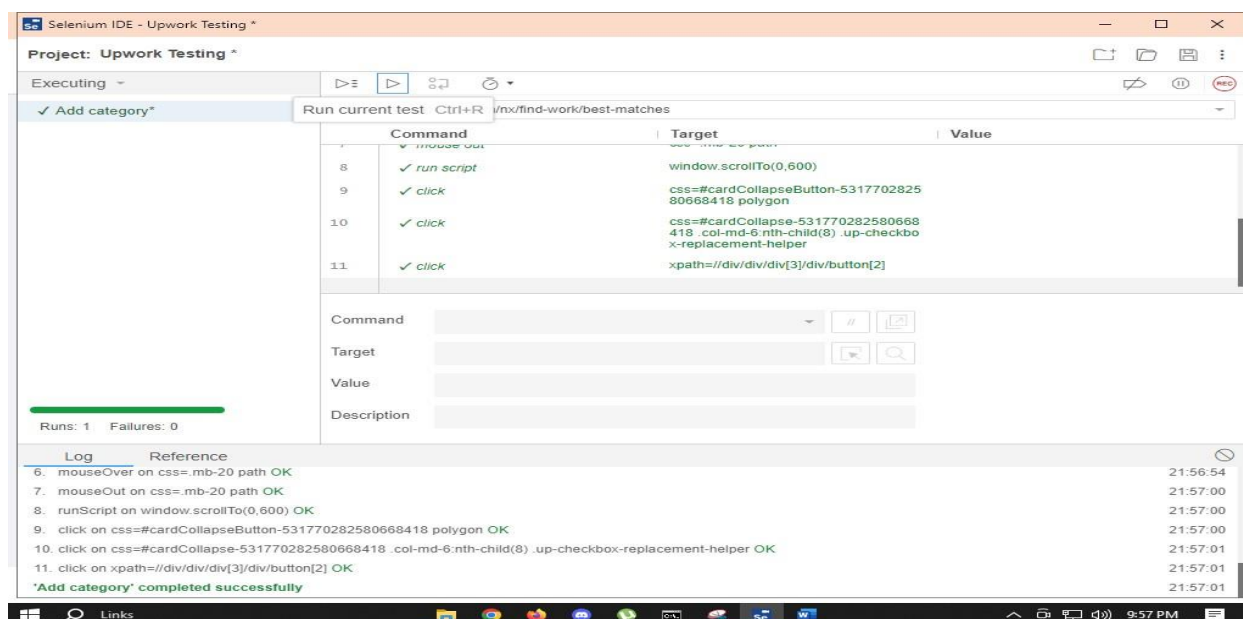

Fig.24: Add category test

## 17. Update profile visibility

Project Name: Upwork		Test Designed by: Md Aminul Islam		
Test Case ID: UPW_TC-17		Test Designed date: 24/08/2023		
Test Priority (Low, Medium, High): High		Test Executed by: Md Aminul Islam		
Module Name: Update Profile visibility		Test Execution date: 24/08/2023		
Test Title: Update Profile visibility				
Description: Test the website feature of Update Profile visibility.				
Precondition (If any): Login as User				
Test Steps	Test Data	Expected Results	Actual Results	Status (Pass /Fail)
1. Go to the homepage 2. Click on Login 3. Choose Update profilevisibility 4. Select an option 5. Click Submit	Update Profile visibility: Upwork user only	Show a message Training or workshop have been added successfully	As expected,	Pass
Post Condition: N/A				

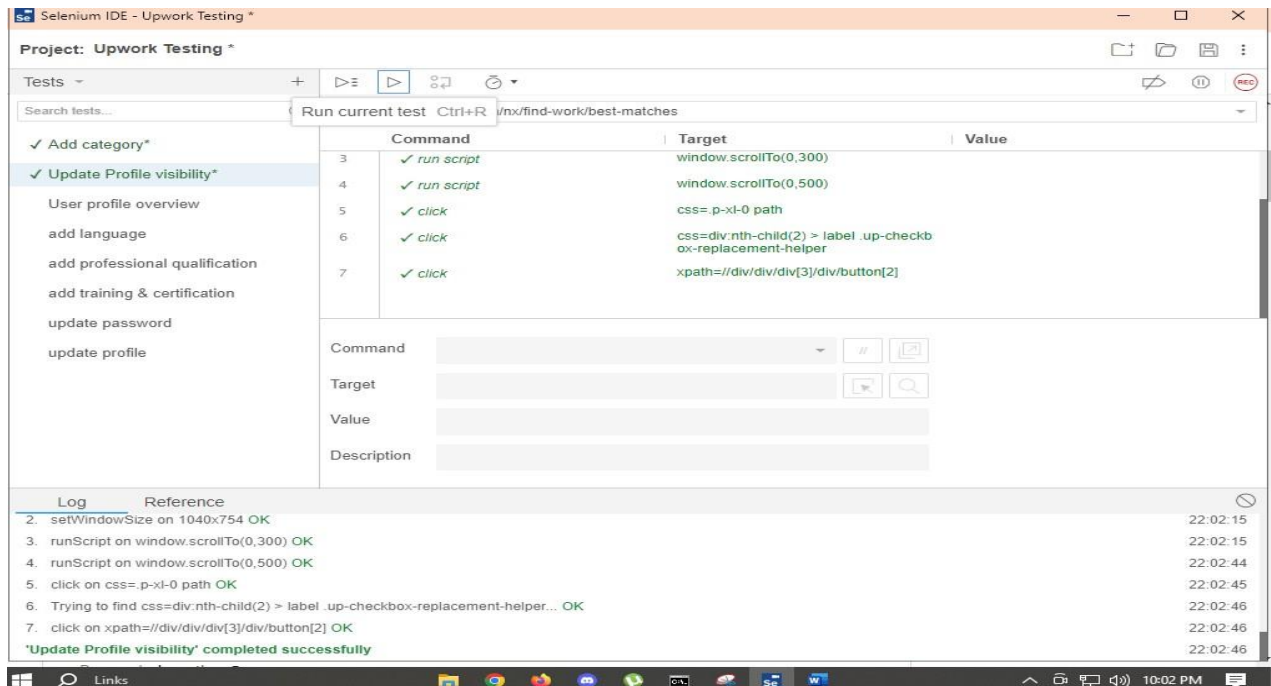

Fig.25: Update profile visibility test

## 18. Turn on availability badge

Project Name: Upwork		Test Designed by: Md Aminul Islam		
Test Case ID: UPW_TC-18		Test Designed date: 24/08/2023		
Test Priority (Low, Medium, High): Medium		Test Executed by: Md Aminul Islam		
Module Name: Turn on availability badge		Test Execution date: 24/08/2023		
Test Title: Turn on availability badge				
Description: Test the website feature of turning on the availabilitybadge.				
Precondition (If any): Login as User				
Test Steps	Test Data	Expected Results	Actual Results	Status (Pass/Fail)
1. Go to the homepage 2. Click on Login 3. Choose availability badge 4. Select an option 5. Click Submit	Turn on availability badge : Available	Show message Training or workshop have been addedsuccessfully	As expected,	Pass
Post Condition: N/A				

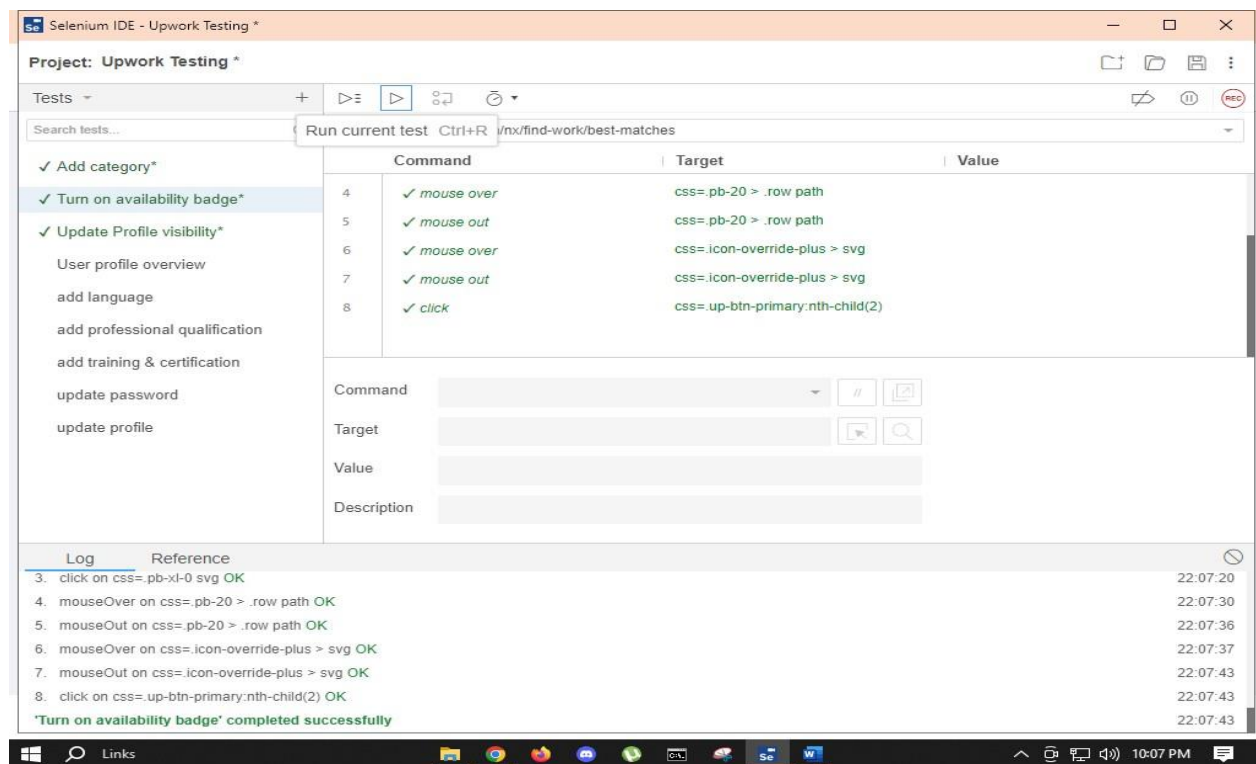

Fig.26: Turn on availability badge test

## 19. Save Job

Project Name: Upwork		Test Designed by: Md Aminul Islam		
Test Case ID: UPW_TC-19		Test Designed date: 24/08/2023		
Test Priority (Low, Medium, High): Medium		Test Executed by: Md Aminul Islam		
Module Name: Save Job		Test Execution date: 24/08/2023		
Test Title: Save Job				
Description: Test the website feature of saving job				
Precondition (If any): Login as User				
Test Steps	Test Data	Expected Results	Actual Results	Status (Pass/Fail)
1. Go to the homepage 2. Click on Login 3. Choose a job 4. Select to save job option 5. Click Submit	Save job: Illustrator for variation on St. George and the dragon	Show a message Training or workshop have been added successfully	As expected,	Pass
Post Condition: N/A				

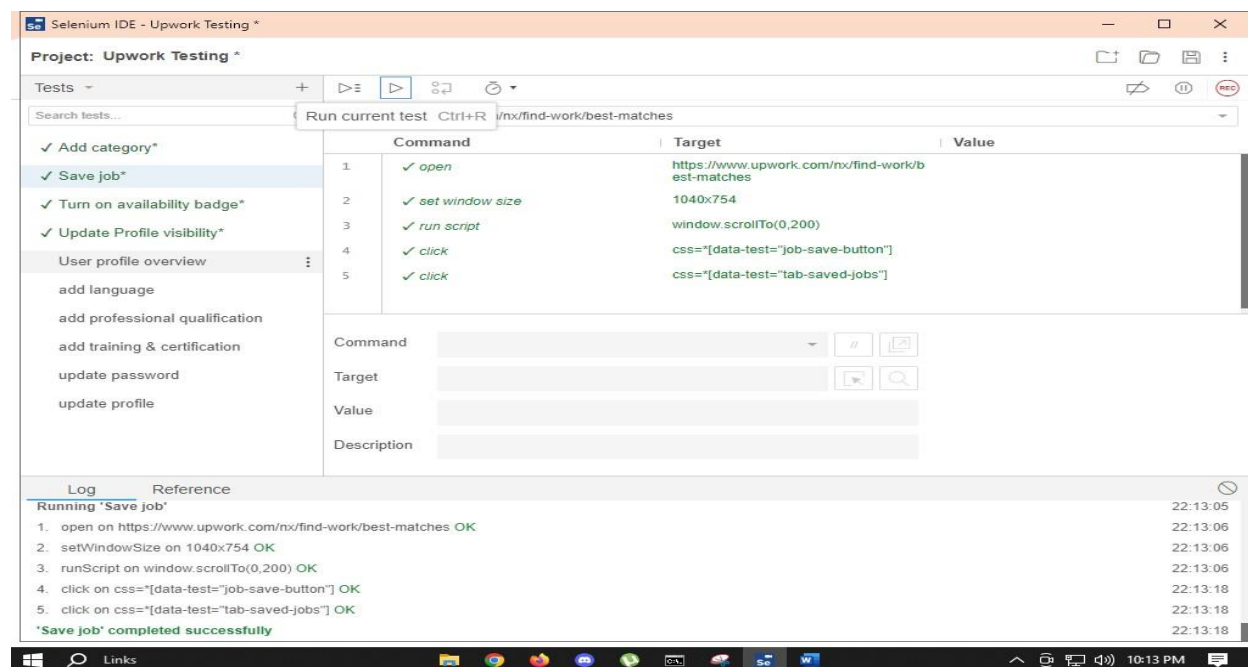

Fig.27: Save job test

## 20. Sign-up as a Client –

Project Name: Upwork			Test Designed by: Shuchi BrataRoy	
Test Case ID: UPW_TC-20			Test Designed date: 25/08/2023	
Test Priority (Low, Medium, High): high			Test Executed by: Shuchi BrataRoy	
Module Name: Client Signup			Test Execution date: 25/08/2023	
Test Title: Client Registration Process				
Description: This test case verifies the functionality of the freelancer signup process on the Upwork platform. It ensures that new users can successfully create their freelancer accounts by providing accurate information and following the necessary steps.				
Precondition (If any): <ul style="list-style-type: none"><li>Internet connectivity is available.</li><li>The Upwork website is accessible.</li></ul>				
Test Steps	Test Data	Expected Results	Actual Results	Status (Pass/Fail)
1. Browse to the Upworkwebsite. 2. Click on the "Sign Up"button. 3. Select the "Apply as aClient" option. 4. Select region, then agree with terms & condition. 5. Click the create myaccount. 6. Then click verify withyour email.	First Name: Nondon Last Name: Roy Email Address: nondonroy09@gmail.com Password: mrroy@999 Region: Bangladesh	The system should display a confirmation message and redirect the user Gmail to verify & show user profile upon successful submission.	As expected,	Pass
Post Condition: User's Client profile should be created, and they should be able to access their Upworkdashboard.				

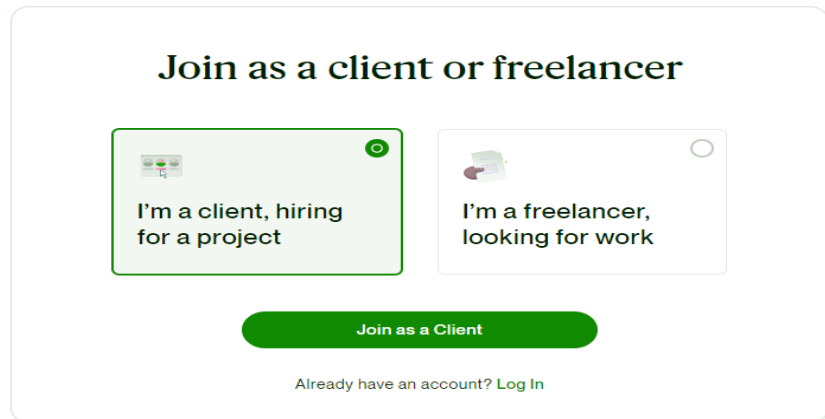

Fig.28: Sign up as client test

Fig.29: Sign up as client

## 21. Login as a Client –

Project Name: Upwork			Test Designed by: Shuchi BrataRoy	
Test Case ID: UPW_TC-21			Test Designed date: 25/08/2023	
Test Priority (Low, Medium, High): high			Test Executed by: Shuchi BrataRoy	
Module Name: Client Login Process			Test Execution date: 25/08/2023	
Test Title: Verify Client Login Process				
Description: This test case aims to verify the successful login process for freelancers on the Upwork platform. It ensures that registered freelancers can access their accounts by providing correct login credentials.				
Precondition (If any): <ul style="list-style-type: none"><li>The user must have a registered Upwork Client account.</li></ul>				
Test Steps	Test Data	Expected Results	Actual Results	Status (Pass/Fail)
1. Go to Upwork website. 2. Click "Log In" option 3. Enter Email Address. 4. Enter Password. 5. Click "Log In" button.	Email Address: nondonroy09@gmail.com Password: mrroy@999	The system should authenticate the user's credentials and redirect them to their freelancer dashboard upon successful login.	As expected,	Pass
Post Condition: N/A				

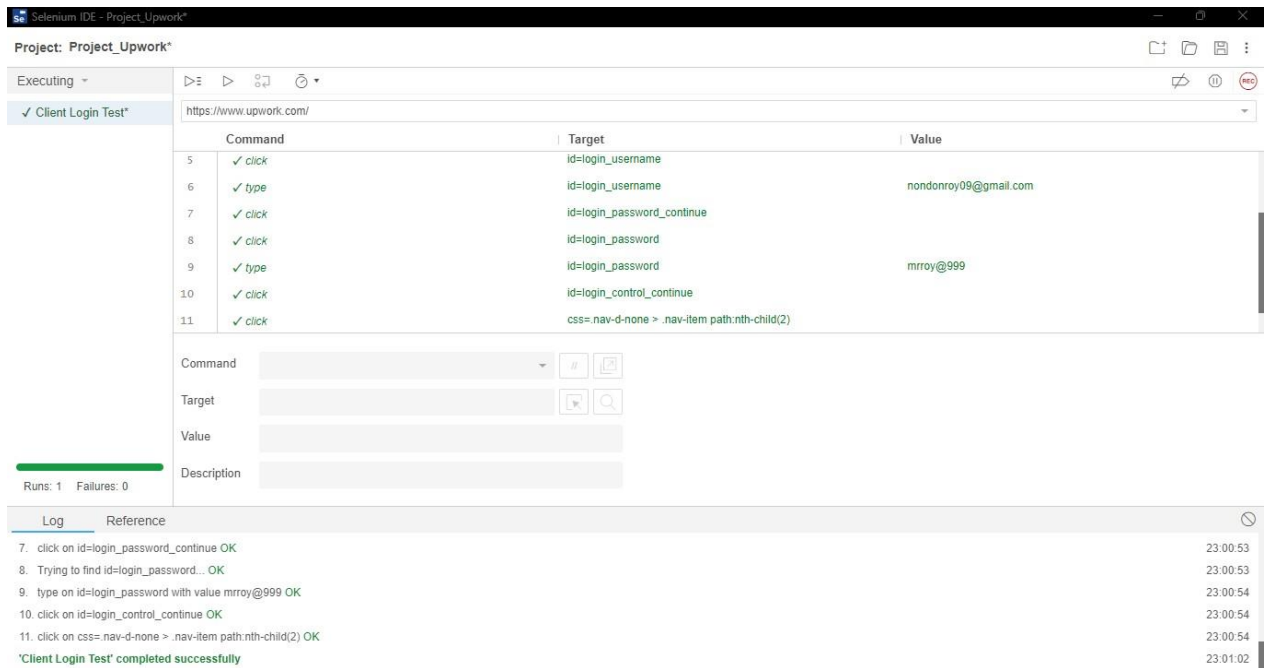

Fig.30: Log-in as client test

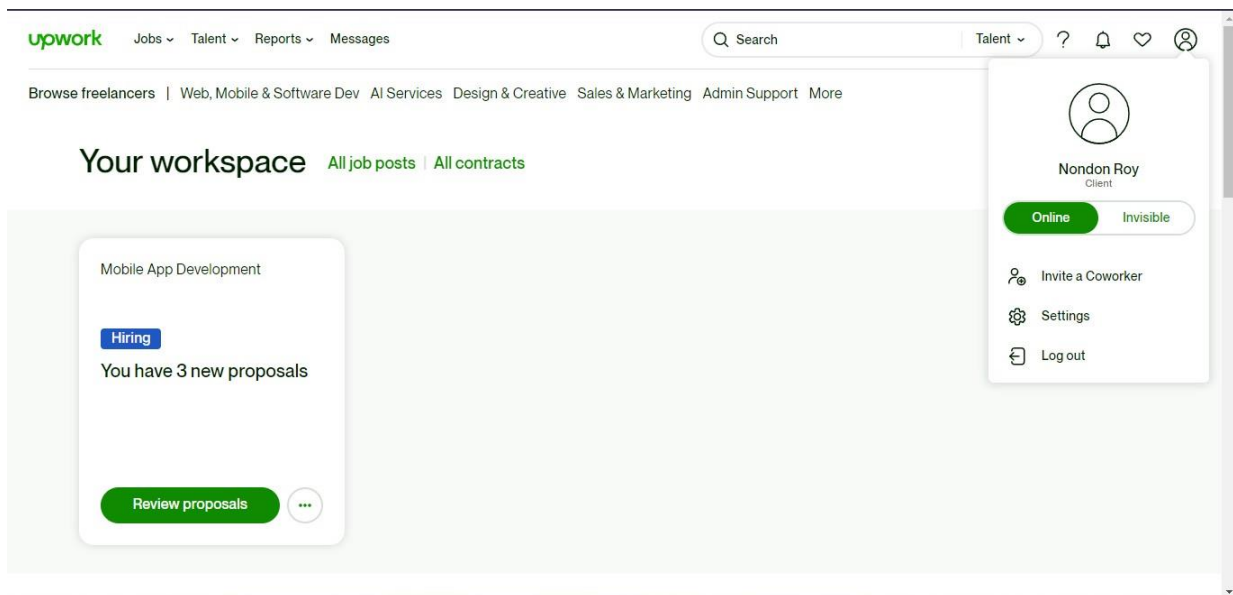

Fig.31: Log-in as client

## 22. View Proposal test –

Project Name: Upwork		Test Designed by: Shuchi BrataRoy		
Test Case ID: UPW_TC-22		Test Designed date: 25/08/2023		
Test Priority (Low, Medium, High): high		Test Executed by: Shuchi BrataRoy		
Module Name: Freelancer Proposal Management		Test Execution date: 25/08/2023		
Test Title: Verify Freelancer Proposal Review Process				
Description: This test case aims to verify the process of reviewing proposals by freelancers on the Upwork platform. It ensures that freelancers can review project proposals they have submitted and assess any feedback or acceptance				
Precondition (If any): <ul style="list-style-type: none"><li>The user must have a registered Upwork Client account.</li><li>The client must have submitted at least one project for a proposal.</li></ul>				
Test Steps	Test Data	Expected Results	Actual Results	Status (Pass/Fail)
1. Go to Upwork website. Log In using valid credentials. 2. Navigate to "review Proposals" section. 3. Locate the submittedproposal for review. 4. Click on the proposal to view details. 5. Review any feedback or acceptance status.	N/A	The system should display the proposal details and any feedback or acceptance status received from the client..	As expected,	Pass
Post Condition: N/A				

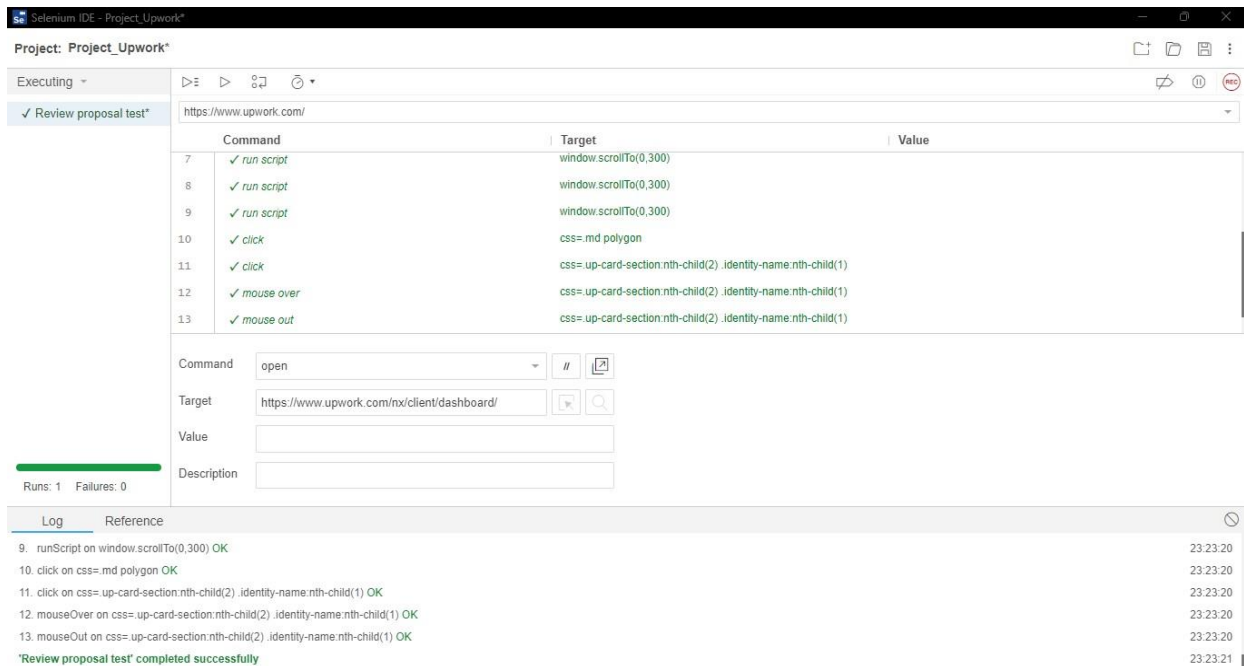

Fig.32: View proposal as client test

## 23. Find expert test –

Project Name: Upwork			Test Designed by: Shuchi BrataRoy	
Test Case ID: UPW_TC-23			Test Designed date: 25/08/2023	
Test Priority (Low, Medium, High): high			Test Executed by: Shuchi BrataRoy	
Module Name: Expert Search Process			Test Execution date: 25/08/2023	
Test Title: Verify Expert Search Process				
Description: This test case aims to validate the accuracy of the expert search process on the Upwork platform. It ensures that users can effectively find experts for specific skills or services they require.				
Precondition (If any): <ul style="list-style-type: none"><li>The user must have a registered Upwork Client account.</li></ul>				
Test Steps	Test Data	Expected Results	Actual Results	Status (Pass/Fail )

1. Go to Upwork website. 2. Ensure you are loggedin. 3.Select the desiredcategory 4. Select different types of filters as per u need. 5. Click search button	Category – Development IT	The system should display a list of experts matching the entered skill or service criteria.	As expected,	Pass
Post Condition: N/A

Post Condition: N/A				

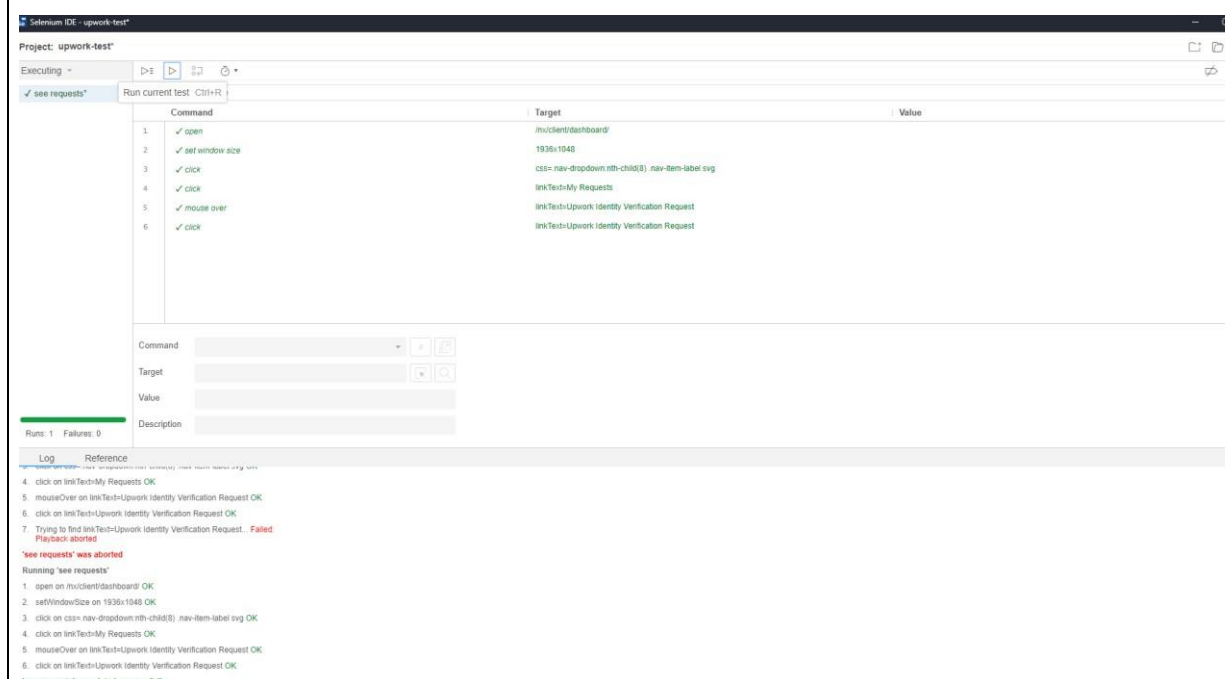

Fig.43: See my request test

## 8. ITEM PASS/FAIL CRITERIA

In our project assessment, a significant portion of the test cases, approximately 85%, successfully passed the evaluation, demonstrating the robustness of the system. However, around 15% of the test cases encountered failures, which highlighted areas that require attention and improvement. Throughout the examination of a total of 32 test cases, a total of 5 defects were detected. Among these, 4 defects were categorized as high-priority, signifying their urgency for resolution. Additionally, 1 defect was classified as medium-priority, which also requires prompt attention.

This indicates that the project doesn't have serious problems. But it's a good idea to carefully check and fix these issues before finishing the project for launch. Many of these problems seem to be related to mistakes in the logic or code. However, looking into these test cases in more detail is not part of the current test plan. In the future, working with the development team will be important to solve these problems. This might mean doing more tests to make sure the project is reliable and high-quality.

## 9. TESTING SCHEDULE

The project plan consists of a series of testing tasks, detailed as follows. The timetable in the project plan offers specific information about when each task will occur and how long it will take. Moreover, the project schedule and plan also specify the personnel needed for each step, which is essential for assessment purposes.

Task	16/08/23	17/08/23	20/08/23	23/08/23	24/08/23	25/08/23	26/08/23
Documentation							
Design							
Test plan							
System Testing							
Project Completion							
Feedback							

## 10. Conclusion –

In summary, this project aimed to make the upwork.com website work better and provide a better experience for users. We tested the website thoroughly to check its features and quality, like how it works and how fast it is. We used a tool called Selenium IDE Chrome extension to help us test and measure its speed and performance. To decide if the project was successful, we had certain rules to follow. We needed to finish all the tests, get feedback from the main person in charge, fix important issues, complete a certain percentage of tests, and get approval from our team leaders. By following these rules, we can confidently decide when to improve and release the website, making it better for people who use upwork.com.
